

ENTERPRICE SOFTWARE SYSTEM

>>>>>>>DECENTRALIZED SYSTEM

>>>>>>>CENTRALIZED SYSTEM [ERP]

DECENTRALIZED SYSTEM

- Data maintained locally at the individual depts.
- Not possible to access from other depts.
- Maintenance amount high. Because separately storage of each
- [Labor cost increases]
- LACK OF TIMELY INFO AND DUPLICATION

SOLUTION

CENTRALIZED SYSTEM [ERP]

- Data is maintained at a central location and is shared with various depts.
- Real time Data access for all the other individual depts.
- No data duplication
- Payments made on time
- Promotes quality,boost profit ,increasethroughput
- Control over various business process
